

Fender Set

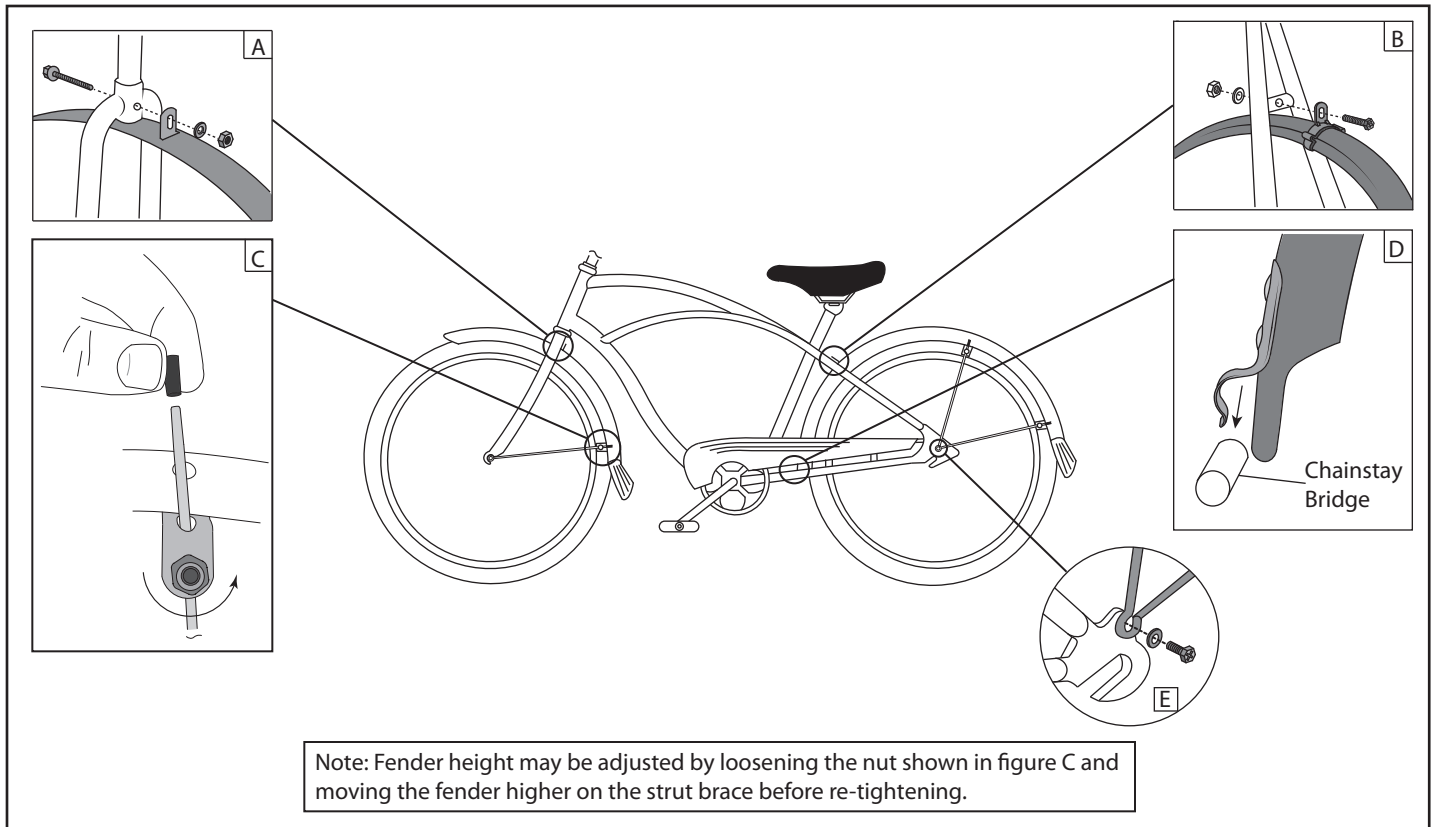

Instruction Manual

FF003

Please read all instructions before installing and using your new fender set.

Warning

Failure to install fenders properly may result in serious injury/death and or damage to your bicycle.

Installation/Use

1. Loosen the nut that secures the struts to the fender by turning them counter clockwise. (Figure C)
2. Remove rubber end stop from struts by pulling upward and thread strut through support hole as shown in figure C. Replace the rubber end stop after alignment.
3. Starting with the rear fender, place the clip onto the chainstay bridge by pushing downward until it snaps in place.
4. Align rear struts and attach to the drop out eyelets as shown in figure E. Do not fully tighten.
5. Place bridge clip onto rear fender and attach to seat stay bridge as shown in figure B.
6. Check for proper tire clearance/alignment, space appropriately and tighten all bolts.
7. Moving to the front fender, loosely attach the fender tab to the fork leaving some play.
8. Align struts so that there is an even space between the tire and fender and bolt to dropout eyelet.
9. Tighten fork mount and eyelet bolts and check for proper clearance/alignment.
