

Please read all instructions before installing and using your lock.

All bicycle locks are meant to be a deterrent. With enough time a thief may break through almost any lock.

Warning

Be careful not to change the combination by accident.

Installation/Use

Keyed Lock (not pictured)

1. Use the key to open the lock.
2. Wrap the lock around the frame of the bike and a stationary object and lock.

Combination Lock (image)

1. Open the lock using the factory combo "0000."
2. Turn the combination setting dial completely clockwise until it stops.
3. Set the combination to the desired code and turn the combination setting dial completely counterclockwise.
4. Close the lock and spin the numbers, then check to make sure the lock set correctly by using your new combo to open the lock. The combination may be reset at any time.
